Subject Index

Aquatic pollution, mercury content of marine fish 181
—, polychlorobiphenyls 189
Arsenic, atmospheric deposition 269
Atmospheric deposition of arsenic and selenium 269
Atmospheric pollution, mutagenicity of ambient air particles 159

Deposition capacity, a comparison of life strategies and morphological types of plants 203
Dissolved organic carbon content of seawater 143

Fog droplets, collection by a jet impaction stage 217

Germanium, biogeochemistry in natural waters 107

Humic substances, release from fresh and dead plant material into seawater 143

Inorganic mercury, possible methylation by silicones 29

Jet impaction stage, for collection of fog droplets 217

Magnetic fields, effect on activity of erythrocyte glutathione peroxidase 267
Mercury content of marine fish 181

Mercury(II), rates of methylation by organotin and organosilicon 39
Mutagenicity of ambient air particles 159

Organoleads in the environment 121
Organosilicon, environmental fate and ecological impact 17
—, methylation of mercury(II) 39
Organotin, methylation of mercury(II) 39

PAH content of environmental samples 257
Pesticides, correlation between application and cancer incidence 229
Polychlorobiphenyls, effect on activity of xenobiotic metabolizing enzymes 189
Polydimethylsiloxanes, contamination of electrical contacts 53
—, thermal decomposition 87

Radon, measurement by a solid state nuclear track detector 245
Raman spectroscopy, application to measurement of silicones 65

Selenium, atmospheric deposition 269
Silicon as a trace nutrient 95
Silicones, as trace contaminants in laboratory solvents 23
—, distribution in water, sediment and fish 1
—, measurement in air by Raman spectroscopy 65
—, possible methylator of inorganic mercury 29
Silicones in sediment, historical record 11
Solid state nuclear track detector, calibration for measurement of indoor radiation levels 245
Sulfide minerals, role of biogenic thiols in solubility 135

Tin, environmental methylation 127
Trimethylsiloxy end-blocked polydimethylsiloxane, kinetics of thermal depolymerization 71
Trimethylsiloxy end-blocked polydimethylsiloxane-*N*-phenylsilazane copolymer, kinetics of thermal depolymerization 71
